INTERVENTIONAL RADIOLOGY

Dr. Awais Siddique

Dr. Awais Siddique is our highly trained interventional radiologist, completing his training at the University of Michigan Health Care Systems, coupled with 16 years of extensive knowledge in treating vascular and non-vascular diseases. Dr. Siddique has performed many cutting edge procedures, including venous ablations, sclerotherapy, deep venous reconstructions, lower extremity angioplasty and stenting, kyphoplasty and embolization procedures to treat tumors, aneurysms, gonadal veins, varicoceles, and the novel procedure of uterine artery embolization for uterine fibroids.

With access to WICE's imaging technology, Dr. Siddique will be able to perform cutting edge procedures with precision, improving patient diagnosis and treatment.

OUR

SERVICES

WIDE BORE 3T MRI

The GE Signa Pioneer 3T offers a 70 cm wide bore design where patients can rest easy with more space and less anxiety. Paired with the latest technology software, patient images can be produced with remarkable quality in shorter scan times leading to faster results and improved patient diagnosis.

DIAGNOSTIC DIGITAL X-RAY

The GE Optima XR646 allows digital radiography to be performed with real time results. Patients can get results same day, allowing physicians to treat and diagnose sooner.

ULTRASOUND

Utilizing the latest technology in sonography, the GE Logic allows extraordinary images to be captured for routine and difficult exams on a broad spectrum of patient body types. We provide vascular as well as general imaging procedures at WICE

BONE MASS DENSITY

The GE Lunar iDXA allows physicians to treat and diagnose osteoporosis and bone health with limited and full body imaging capabilities.

COMPUTED TOMOGRAPHY

Enhancing patient safety and increasing patient comfort with ASiR-V technology, the GE Revolution EVO 64 slice scanner provides fast, high resolution images, allowing physicians to focus on diagnosing their patients. With the ability to perform interventional procedures, paired with our highly trained interventional radiologist, we are able to take patient diagnosis and treatment to the next level.
